AMR SERIES

MODEL

AMR-300

The AMR-300 moves material between stations, stores and production lines without operators, tracks, or magnetic tape. LiDAR-based natural navigation maps your plant as-is, the fleet manager dispatches jobs from your ERP or MES, and roller-top or lift-top modules match your load units. Dual safety LiDAR plus bumpers keep it safe around people and forklifts.

Autonomous
Payload 300 kg

LiDAR SLAM
Natural navigation, no tape / reflectors

Fleet Manager
ERP / MES integration, opportunity charging

Safety Rated
Dual safety LiDAR + bumpers

01 SPECIFICATIONS

MECHANICAL

TYPE	AGV / Autonomous Mobile Robot
PAYLOAD	300 kg
NAVIGATION	Natural navigation (LiDAR SLAM)
DOCKING ACCURACY	±10 mm

ENVIRONMENT / CONTROL

TOP MODULES	Roller-top / Lift-top / Custom
FLEET MANAGEMENT	Texsonics fleet manager, ERP/MES integration
CHARGING	Opportunity charging, auto-dock
SAFETY	Dual safety LiDAR + bumpers

02 PRODUCT

AMR-300 · AMR SERIES

03 WORKING RANGE

MOTION — GROUP A

TRAVEL SPEED	≤ 1.5 m/s
RUNTIME	~8 h per charge
MIN AISLE WIDTH	900 mm

MOTION — GROUP B

GRADEABILITY	≤ 5% incline
TURNING FOOTPRINT	Turns in place (differential drive)

04 OVERVIEW

INTRALOGISTICS THAT DRIVES ITSELF — NO TAPE, NO TRACKS, NO OPERATOR.

The AMR-300 moves material across your plant autonomously using LiDAR-based natural navigation. Jobs are dispatched from the Texsonics fleet manager and integrated with your ERP or MES.

01
NATURAL NAVIGATION
LiDAR SLAM maps your facility as-is. No floor markers, no reflectors, no infrastructure to install.

02
FLEET DISPATCH
Central fleet manager routes jobs to the nearest available unit and hands off work between shifts, cells and lines.

03
SAFETY BY DESIGN
Dual safety-rated LiDAR plus bumpers keep the AMR safe around operators, forklifts and mixed traffic.

05 CONTROL & INTEGRATION

CONTROLLER
Texsonics RC series
in-house motion controller, dual-kernel real-time OS

TEACH PENDANT
11.5” touch tablet
drag-teaching, Wi-Fi, on-device offline programming

FIELDBUS
EtherCAT / Modbus TCP
industrial fieldbus, dual-protocol support

SOFTWARE
TEXCAM offline CAM
toolpath generation, digital twin simulation, vision

06 APPLICATIONS

Autonomous material movement across production, warehousing and finished-goods flows — dispatched from the Texsonics fleet manager.

- Line-side Delivery
- Warehouse Transfer
- WIP Movement
- Finished Goods Transport
- Machine Tending
- CNC Loading
- Palletizing
- Assembly
- Packaging
- Vision Inspection

07 BUILT FOR THE OPERATOR

- Live 3D position display
- Online command execution
- Position editor
- Variable monitor
- I/O monitor
- Error diagnostics
- Dynamic teach-in
- Digital twin simulation

08 SERVICE & SUPPORT

Made in Coimbatore. Supported from Coimbatore.

Every AMR-300 is engineered, built and calibrated in our Coimbatore facility. Field service, spares and applications engineering ship from the same address — no import lead times, no time-zone escalations.

STANDARD WARRANTY
12 months on the mechanical assembly, 12 months on the controller.

APPLICATIONS ENGINEERING
Cell design, cycle-time studies and end-of-arm tooling by our in-house team, included on every project.

SPARES & FIELD SERVICE
Direct-to-plant spares from Coimbatore, with pan-India field service engineers on 24-hour dispatch.

09 READY TO INTEGRATE

Talk to an engineer about integrating the AMR-300 into your line.

Applications engineering, cycle-time sizing, and turnkey cell design are included on every project.
