

COMPANY PORTFOLIO

TEXSONICS SYSTEMS INDIA PRIVATE LIMITED

Industrial Robots. Made in India.

Texsonics designs, manufactures and supports industrial robot arms, collaborative robots, autonomous mobile robots, and the controller and CAM software that drive them — entirely from our Coimbatore facility. 27+ years of precision engineering, one integrated stack.

Founded 1998 Coimbatore, Tamil Nadu · 27+ years engineering	Whole Stack Arm · controller · drives · pendant · CAM	20+ Team Mechanical, electrical, firmware, software	150+ Customers Automotive, foundries, machine builders, OEMs

01

AT A GLANCE

COMPANY

LEGAL NAME	Texsonics Systems India Private Limited
FOUNDED	1998
HEAD OFFICE	Coimbatore, Tamil Nadu, India
FACILITY	25,000 sq.ft manufacturing works
TEAM	20+ engineers and technicians

MARKET

SECTORS	Industrial robotics, factory automation
CUSTOMERS	150+ across India and export markets
EXPORTS	UAE · Singapore · Malaysia · Indonesia · South Africa
CERTIFICATIONS	ISO-aligned engineering & QA processes
BUSINESS TYPE	OEM · turnkey integrator · service

02 WHO WE ARE 27 YEARS OF ENGINEERING. NOW BUILDING ROBOTS.

Founded in 1998 in Coimbatore, Texsonics spent over two decades as a precision sheet-metal fabrication and automation-support partner for OEMs and machine builders. That discipline — tight tolerances, fast turnarounds, everything under one roof — is exactly what building robots demands. Today robotics is our focus, and every arm, controller, pendant, and software layer is designed and supported by our own engineers.

01 ENGINEERING FIRST

Every machine we ship is designed, built and tested by our own engineers — no rebadged imports, no black boxes.

02 CUSTOMER PARTNERSHIP

We automate your process, not just sell you hardware. Cell scoping, integration, operator training — one team, one throat to choke.

03 PRECISION HERITAGE

27+ years of tight-tolerance sheet-metal and precision manufacturing discipline now applied to robot arms, drives, and motion controllers.

03 COIMBATORE WORKS

INDIGENOUS ROBOT CONTROLLER • DIGITAL TWIN • KEERANATHAM, COIMBATORE

04

MILESTONES

Twenty-seven years from a precision sheet-metal fabricator to a full-stack robotics manufacturer.

STEP 01

1998

Founded in Coimbatore as a precision sheet-metal fabrication company.

STEP 02

2000s

Enclosures, machine covers, control panels and sheet-metal parts for OEMs and machine builders.

STEP 03

2020s

Pivoted focus toward automation — cell design, controllers and turnkey integration.

STEP 04

2024

RC series robot controller and TEXCAM programming platform completed.

STEP 05

Today

Building 4-6 axis arms, cobots and AMRs — with our own controller and CAM.

05

THE STACK

MECHANICAL

Robot arms & AMRs

in-house design, cast bodies, harmonic-drive joints

ELECTRICAL

Controller & drives

RC series real-time controller, servo drives, safety I/O

SOFTWARE

TEXCAM & pendant

offline CAM, digital twin sim, 11.5" teach pendant

SUPPORT

Local service

cell design, integration, spares, pan-India field service

06

ROBOT LINEUP

Seven robot platforms in production — 4- and 6-axis industrial arms, a SCARA, a collaborative robot, and an AMR — each with a detailed individual catalogue.

TS SERIES

TS4-560

Compact 6-axis for 3C assembly.

6-AXIS · 4 kg · 560 mm

TS SERIES

TS6-0808

Compact 6-axis for machine tending.

6-AXIS · 8 kg · 827 mm

TS SERIES

TS6-1215

General purpose 6-axis with 1.46 m reach.

6-AXIS · 12 kg · 1463 mm

TS SERIES

TS6-2518

Heavy-payload 6-axis for palletizing.

6-AXIS · 25 kg · 1808 mm

TSA SERIES

TSA700-6N

4-axis SCARA for planar high-cycle work.

4-AXIS SCARA · 6 kg · 700 mm

TSCR SERIES

TSCR-05E

Collaborative robot for fence-free cells.

6-AXIS COBOT · 5 kg · 800 mm

AMR SERIES

AMR-300

AGV/AMR for intralogistics.

AUTONOMOUS · 300 kg PAYLOAD

07

INDUSTRIES SERVED

From automotive line automation to foundry press-tending, we engineer cells that hold up on real factory floors — not lab demos.

Automotive

Foundries

Sheet Metal

CNC Workshops

Textiles

Plastic Molding

Electronics

Pharmaceutical

Engineering Components

Machine Builders

Stamping

OEMs

08

APPLICATIONS

Machine Tending

CNC Loading / Unloading

Palletizing

Welding

Spray Painting

Assembly

Packaging

Material Handling

Vision Inspection

Pick & Place

09

CAPABILITIES

- Turnkey robot cells

■ Robot arm manufacture

■ In-house RC controller

■ Servo drives & motors

■ Teach pendant hardware

■ TEXCAM offline programming
- Machine vision integration

■ End-of-arm tooling

■ Cell design & simulation

■ Operator training

■ Field service & AMC

■ Spares from Coimbatore

10

GLOBAL REACH

Beyond India, our robots and cells ship to customers across the Gulf, South-East Asia and Africa — installed and commissioned by our own engineers.

- India
- United Arab Emirates
- Singapore
- Malaysia
- Indonesia
- South Africa

11

OUR APPROACH

From first conversation to line hand-over, every project runs through the same four-phase engagement — cell scoping, engineering, deployment, and ongoing support.

01 · DISCOVER Process study Site visits, cycle-time capture, ROI sizing, and layout concepts — before quoting.	02 · DESIGN Cell engineering Robot selection, end-of-arm tooling, safety design, fieldbus and vision integration.	03 · DELIVER Build & install Cell fabrication, wiring, software, factory acceptance, on-site commissioning and operator training.	04 · SUPPORT Ongoing service Preventive AMC, spares, remote diagnostics and pan-India field service on 24-hour dispatch.
---	--	--	---

12

STANDARDS & QUALITY

ENGINEERING		QUALITY & DELIVERY	
DESIGN REVIEW	Multi-stage review across mechanical, electrical and firmware disciplines	QMS	ISO-aligned quality management processes
MATERIALS	Traceable steel, aluminium and casting supply chain	FAT	Full factory acceptance test before dispatch — documented and video-recorded
PRECISION MACHINING	In-house CNC + inspection ensures ±0.02 mm arm accuracy	SAT	On-site acceptance with customer sign-off
MOTION TUNING	Every arm calibrated on our own test rigs before shipment	DOCUMENTATION	Wiring diagrams, part lists, backup images and full user manuals ship with every unit
ELECTRICAL SAFETY	IEC 60204-1 aligned wiring, dual-channel E-stop, safety-rated I/O	WARRANTY	12 months mechanical + 12 months controller, with pan-India on-site service

13

READY TO TALK

Talk to an engineer about automating your line.

Cell scoping, cycle-time sizing, integration, training, and AMC support — included on every project.
